Creating a Profile

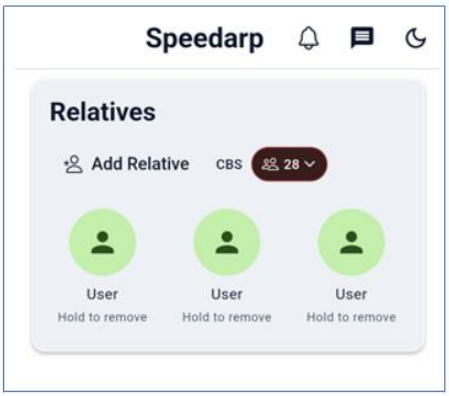

After downloading the app, on the Home Screen, you observe New User. This is because the app creates **New User** as your default name. Now tap on **Profile (**bottom right of the screen) and then tap on **Edit Profile.** In the Media Upload, upload any image of yours or any image of your choice to remain distinguishable. Now under the Personal Information section fill in all the necessary fields**.** In the Full Name field, delete New User and enter your name preferably adding your surname or family name. Then enter your, Phone Number, Birthday date and Gender. Then you come across Occupation field, which is a mandatory field to be filled. It has been made mandatory because, it provides input for the Occupational Compass feature. If your occupation isn't found in the list of occupations provided in the drop-down box, select "Others" from the given options. Rest of the fields like Blood Group and Social Media links are optional. Tap on Save Changes. *Congrats!! you have now created your Speedarp profile successfully*

Adding Relatives

In the Relatives section (on the home screen), there is **Add Relative** option, tap on that. Under the Select Person, enter the name of the relative or cousin you wish to add. Once you find the name of the person you are searching for, in the Relationship Type, select the type of relationship that is applicable to this person. Tap on the down arrow and the app offers you 23 options. Then you have the Custom Label field wherein you can add the name with which you call this person just like nick name. This is an optional field. You then get an Add option on the top right of the screen. Tap on add and the person gets added your relatives list. Beside the Add Relative option, there is CBS, which means **Cousin Bonding Score.** Every time you add a cousin or relative, this score increases by 2, a bit of gamification!

Creating Events

Speedarp's Events creation feature is one of its most unique offerings. It allows users to create customized events that reflect the rhythm of their family lives and relationship milestones. To start creating your own events, tap on the Create Event

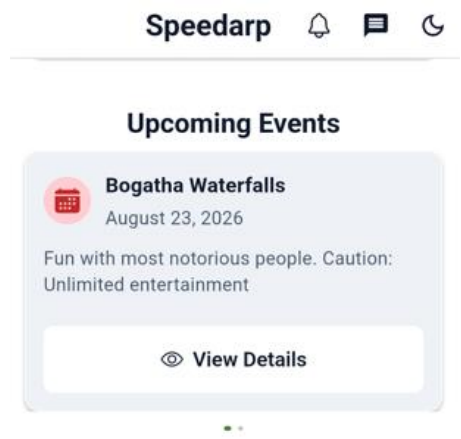

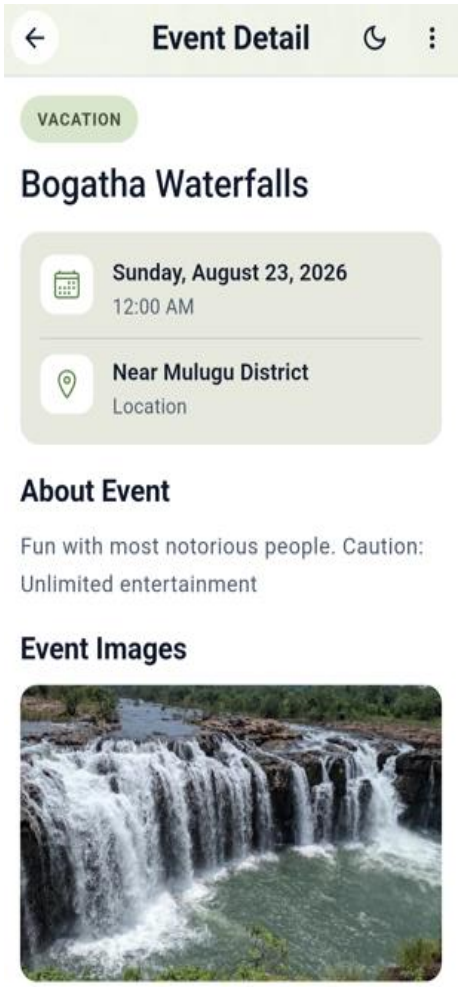

Let's create an event say visiting Bogatha Waterfalls. Next, in the Event Type, select the option which suits your event like Family, Birthday, Vacation, Anniversary, Holiday and others. Then in the Event Date field, enter the date, and provide a description of the event. In the location field provide details of the location and then add images related to the event. In the Invite People option add the list of people you wish to invite to the event and then tap on Create Event. Your customized event is now created.

Now return to home screen and you observe in the notification area regarding the event as Upcoming Events. Click on **View Details**, you will know about the event, date and day, location, event description and images related to the event in **Event Detail** screen. Scroll down further, you can know about the Organizer of the event and the people who are attending the event.

Creating a Family Tree

Note: For adding a remembered person there is no need for having an active Speedarp profile. Tap on the **Your Family Tree** option on the home screen. Now tap on the + button (in green color) at the bottom right of the screen. You will find the Add Family Member screen. In the Relation Type section select the type of relationship you wish to add. Ignore the Reference Person section as it you who is creating the family tree. In the same screen you can see **Remembered** option. Toggle the button to right and a popup screen appears. Here you enter the name tap on confirm option. Now tap on **Add Relationship** button. In this manner you can add any number of loved ones who passed away.

Adding Parents

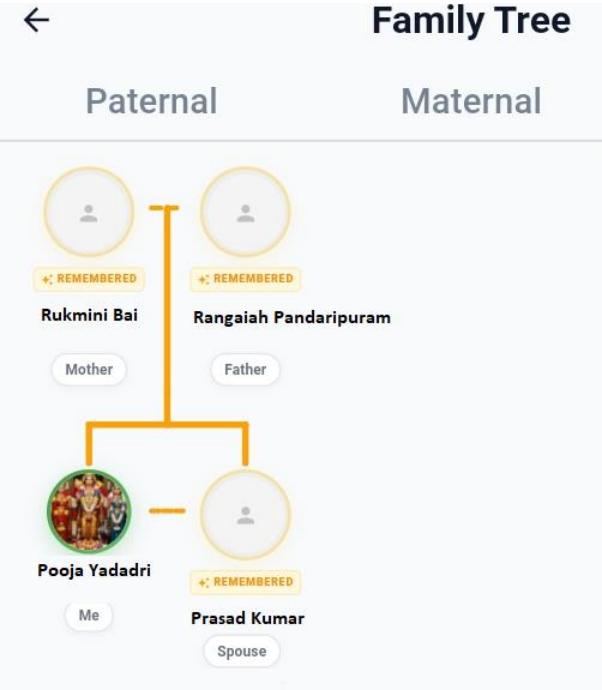

Tap on the + button (at the bottom right of the screen). Now tap on parent, you have two options, mother and father, select Father option and in the lineage side option select whichever is appropriate, Maternal, Paternal or Both. Ignore the Reference Person section as it you who is creating the family tree. In the Family Member section enter the name of the family person you wish to add. Once you find the name, tap on add relationship and this member will be added to your family tree. In the next step again tap on + button (at the bottom right of the screen). Select Parent, and select Mother. Now in the Family Member section, search for the user and once you find the user tap on Add Relationship. Suppose if mother or father is deceased (expired) use the Remembered Option.
